

ST-TF

HIGH CAPACITY FEEDER STACKER

McCloskey International's heavy duty high capacity feeder stacker the ST-TF is designed to deliver enhanced handling and stockpiling of a wide range of materials across industries including aggregates, composting, landscaping and mining. The ST-TF is an excellent alternative when a traditional direct load stacker may not be the right match for the material, and offers an economical yet highly productive option to the larger TF80.

The ST-TF features a large capacity hopper (5.75 cu.m. or 7.5 cu. yd.) with adjustable height, ensuring optimized operational efficiency on the job. The design reflects feedback from customers in a cross-section of applications and industries, and McCloskey International's commitment to deliver the best products based on that input.

HIGH CAPACITY HOPPER
Over 7 cubic yards allows for larger amounts of material to be directly loaded into the hopper.

REMOVEABLE FEEDER WINGS
Reduces spillage and can be configured to accommodate the desired direction of material loading.

POWER UNIT
Diesel drive with cast iron triple flywheel pumps as standard.

HYDRAULIC STABILIZER LEGS
Hydraulic Stabilizer legs enhance stability while in operation.

HYDRAULIC TOP FOLD
Straightforward hydraulic controls to fold and unfold, raise and lower conveyor.

Engine - Power Unit	Diesel
Transport Height	11' 3" (3.4m)
Transport Length	60' (18.3m)
Transport Width	8' 5" (2.6m)
Stockpile Height	31' 10" (9.7m)
Stockpile Capacity	2,217 yds ³ (1,695 m ³)
Production	750 US TPH (680 metric TPH)
Belt	36" - HD 3 ply

ST80TF

ST100TF

Engine - Power Unit	Diesel
Transport Height	13' 6" (4.11m)
Transport Length	78' 5" (23.91m)
Transport Width	8' 5" (2.6m)
Stockpile Height	41' 10" (12.77m)
Stockpile Capacity	4,927 yds ³ (3,766 m ³)
Production	750 US TPH (680 metric TPH)
Belt	36" - HD 3 ply
